

Maytag MLE23PDFZW 14 - WIRING INFORMATION(ELEC)

Diagnostic Mode:

This mode is normally accessed by the **UPPER DRYER** control panel. The user can enter a diagnostic mode through the control panel by pressing the **PERMANENT PRESS** key for 1 second while in any of the dryer modes.

One step to diagnostic mode the settings display will flash, and certain test options will be cleared, and diagnostic codes are cleared. If a diagnostic code persists on either of the machines, the fault must be corrected before the following cycle options are permitted.

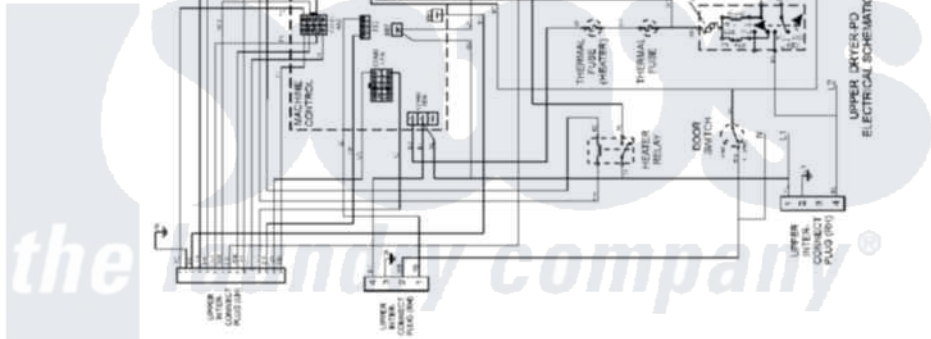

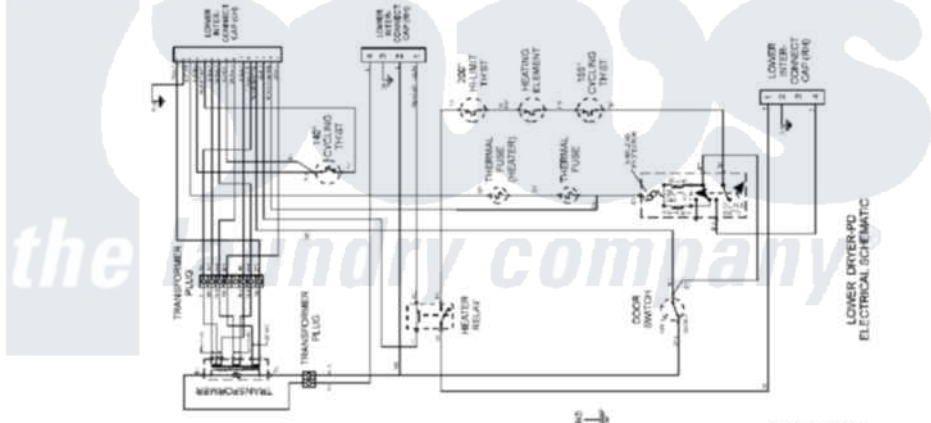

Procedures to initiate cycle activity from diagnostic mode are as follows:

1. **Upper Dryer Field Diagnostic Cycle** - With the dryer in diagnostic mode, the **UPPER DRYER PERMANENT PRESS** key pad. This cycle consists of seven minutes of heat and six minutes of cool down. The **UPPER DRYER** **WHEELS & COILS** key pad will initiate the diagnostic cycle. The **UPPER DRYER** **DRYER DELICATES** key pad will cancel this cycle and exit the diagnostic mode.
2. **Lower Dryer Field Diagnostic Cycle** - With the dryer in diagnostic mode, the cycle is initiated by pressing the **LOWER DRYER** **PERMANENT PRESS** key pad.

Diagnostic Codes:

If the set up results in control and one of the diagnostic codes are displayed, the appropriate diagnostic code will be on the display.

- #1 - Upper dryer door sensor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #2 - Lower dryer door sensor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #3 - Blocked coils (no heat) diagnostic code (no heat) diagnostic code is normally cleared.
- #4 - Voltage detected (low) (no heat) diagnostic code (no heat) diagnostic code is normally cleared.
- #5 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #6 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #7 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #8 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #9 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #10 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #11 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #12 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #13 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #14 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #15 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #16 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
- #17 - Upper dryer motor error (no contact) based on the door to power the interlock (upper dryer door sensor error) diagnostic code is normally cleared.
- #18 - Lower dryer motor error (no contact) based on the door to power the interlock (lower dryer door sensor error) diagnostic code is normally cleared.
