## Diagnostic Mode:

This mode is normally accessed by the LADDER SWITCH. Accessing the diagnostic mode will allow you to view through the screen a diagnostic code in percent, or which, DAS displays if operating with Maytag Data Acquisition system.

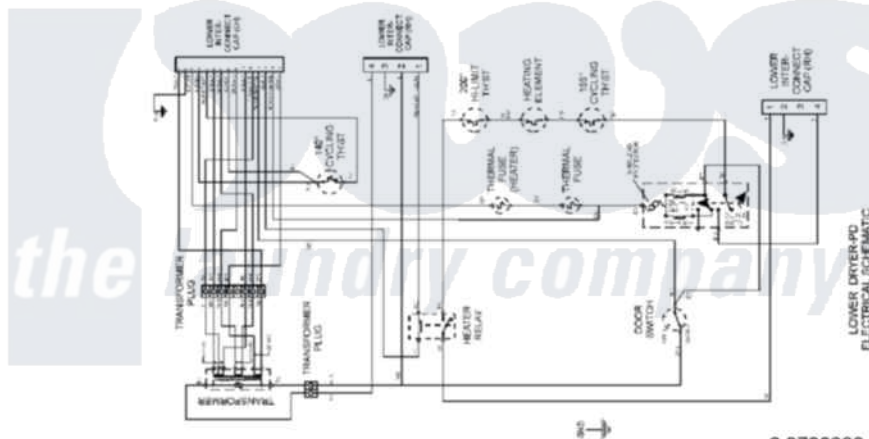

One step to diagnostic mode the settings display will flash, and certain screens will be cleared, and diagnostic codes are cleared. If a diagnostic code persists on either of the machines, the fault must be corrected before the following cycle options are permitted. Procedures to initiate cycle activity from diagnostic mode are as follows:

1. Upper Dryer Field Diagnostic Cycle - With the cycle door closed, the cycle is started by the UPPER DRYER PERMANENT PRESS key pad. The cycle consists of seven minutes of heat and six minutes of cool down. The UPPER DRYER WHITES & COLORS key pad will interrupt the diagnostic cycle whenever it is pressed. The DRYER DELICATES key pad will cancel this cycle and exit the diagnostic mode.
2. Lower Dryer Field Diagnostic Cycle - With the cycle display flashing, this cycle is started by pressing the LOWER DRYER

## Diagnostic Codes:
