

Maytag MLG23PDFWW 14 - WIRING INFORMATION(ELEC)

Diagnostic Mode:

This mode is normally accessed by pressing the **LAUNDRY SIGNAL** button on the control panel for 1 second while in any of the ready modes. Once through this sequence a diagnostic code is present, or which, **CLAS** displays if operating with Maytag Data Assistant panel.

One step to diagnostic mode the settings display will flash, and certain test options will be cleared, and diagnostic codes are cleared. If a diagnostic code persists on either of the machines, the fault must be corrected before the following cycle options are permitted.

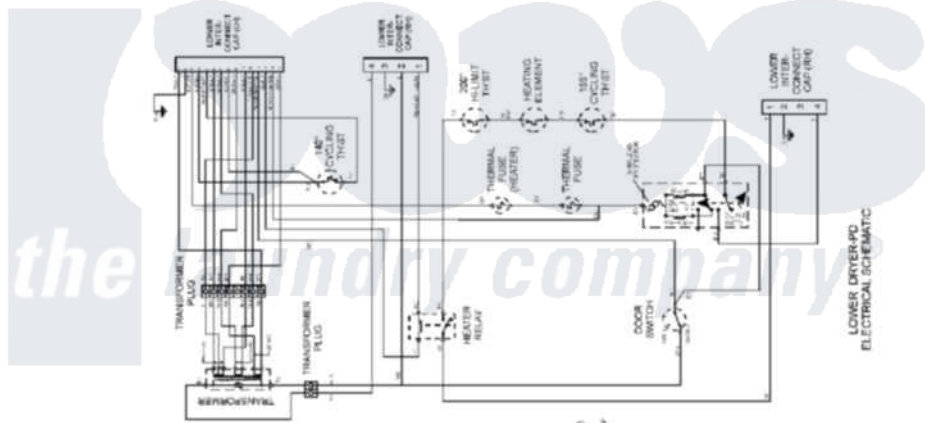

Procedures to initiate cycle activity from diagnostic mode are as follows:

1. **Upper Dryer Field Diagnostic Cycle** - With the control panel in diagnostic mode, press the **PERMANENT PRESS** key pad. This cycle consists of seven minutes of heat and six minutes of cool down. The **UPPER DRYER** **WHITES & COLORS** key pad will initiate the diagnostic cycle. Pressing the **LOW VOLT DRYER DELICATES** key pad will cancel this cycle and end the diagnostic mode.
2. **Lower Dryer Field Diagnostic Cycle** - With the control panel flashing, this cycle is initiated by pressing the **LOWER DRYER**

Diagnostic Codes:

If the set-up results in control and one of the diagnostic codes is present, the appropriate diagnostic code will be on the display.

- #1 - Upper dryer door sensor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the door sensor diagnostic code is normally cleared.
- #2 - Lower dryer door sensor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the door sensor diagnostic code is normally cleared.
- #3 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #4 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #5 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #6 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #7 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #8 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #9 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #10 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #11 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #12 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #13 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #14 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #15 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #16 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #17 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #18 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #19 - Upper dryer motor error (no contact) based on the fact that the maximum upper dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
- #20 - Lower dryer motor error (no contact) based on the fact that the maximum lower dryer cycle time is 120 minutes. If the diagnostic code is present, the motor error diagnostic code is normally cleared.
